DETAILED ACTION

1. Claims 1-39 are pending as amended on 16 March 2007. Claims 2-13, 15-17, 20-32 and 35-39 are withdrawn from consideration.
2. The text of those sections of Title 35, US Code not included in this action can be found in a prior Office action.

Election/Restrictions

3. Newly submitted claims 35-39 are directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claims 35-39 are directed to a thin film comprising the composition of the claim 34 and a globe comprising said thin film, these claims are related to the previously examined claims in an intermediate-final product manner.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 35-39 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

4. This application contains claims 2-13, 15-17, 20-32 drawn to species nonelected the response filed 29 June 2006 and claims 35-39 drawn to an invention constructively nonelected by original presentation. A complete reply to the final rejection must include

Art Unit: 1712

cancellation of nonelected claims or other appropriate action (37 CFR 1.144) See MPEP § 821.01.

Specification

5. Applicant is reminded that the incorporation of essential material in the specification by reference to an unpublished US application, foreign application or patent, or to a publication is improper. Applicant is required to amend the disclosure to include the material incorporated by reference, if the material is relied upon to overcome any objection, rejection, or other requirement imposed by the Office. The amendment must be accompanied by a statement executed by the applicant, or a practitioner representing the applicant, stating that the material being inserted is the material previously incorporated by reference and that the amendment contains no new matter. 37 CFR 1.57(f).

6. Applicant is reminded that the use of the trademark MACBETH COLOREYE has been noted in this application. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner that might adversely affect their validity as trademarks.

Response to Amendment

7. Applicants amendment, filed 16 March 2007, particularly the removal of parenthetical claim limitations has been fully considered and is corrective.

The rejection of claims 1, 14, 18 and 19 under 35 USC 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention has been withdrawn.

8. Applicants amendment, filed 16 March 2007, particularly requiring the hindered amine light stabilizing material to comprise pendant a siloxane chain has been fully considered and overcomes the following.

The rejection of claims 1, 14, 18 and 19 under 35 USC 102(b) as being anticipated by US Patent 6,013,729 (Tsuji moto hereinafter) has been withdrawn.

Claim Rejections - 35 USC § 103

9. Claim 33 stands and claims 1, 14, 18, 19 and new claim 34 are rejected under 35 USC § 103(a) as being unpatentable over Tsujimoto in view of International Patent Application Publication WO 96/16110 (Karrer hereinafter). An English language translation of Karrer has been obtained and is enclosed with this Office Action.

Tsuji moto teaches an elastomer composition—including linear organohydrogensiloxanes crosslinked with a platinum-vinylsiloxane complex (Column 4 Line 36 – Column 6 Line 3) and other additives such as hindered amine light stabilizers (Column 9 Lines 20-29).

Art Unit: 1712

Tsujimoto does not disclose expressly the use of organosiloxane modified hindered amines.

Karrer discloses polyorganosiloxanes, including those with sterically hindered tertiary amine functionality with a pendant siloxane chain (Title, Abstract and Formula of Page 14).

At the time of the invention, it would have been obvious to a person of ordinary skill in the art to include the polyorganosiloxane hindered amines of Karrer in the composition of Tsujimoto. The motivation to do so would have been to improve the light stabilization of polymers (Karrer Abstract).

Regarding claim 34, a recitation of the intended use of the claimed invention must result in a structural difference between the claimed invention and the prior art in order to patentably distinguish the claimed invention from the prior art. If the prior art structure is capable of performing the intended use, then it meets the claim. Further, since Tsujimoto and Karrer combine to teach the same composition as claimed, the curability of the Tsujimoto/Karrer composition would inherently be the same as claimed.

Conclusion

10. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
